Re: Integration of Bone Bank Allografts with Texas Human Biologics

To Whom It May Concern,

Bone Bank Allografts (BBA) is pleased to announce the completed integration of Bone Bank Allografts' operations with Texas Human Biologics (THB), also based in San Antonio, Texas.

THB's strong tissue processing and product development experience, with BBA's recovery and distribution network, now makes us a full service tissue processor with increased resources to further expand our activities, while continuing to provide safe, quality allografts to meet all of our customers' needs.

Our newly integrated company will remain under the name of **Bone Bank Allografts** and, **effective October 1st, 2017**, the full scope of operations now performed by BBA (donor eligibility, manufacturing labeling, and distribution), **are covered under Bone Bank Allografts' current certifications and registrations**. Requests for updated certifications and registrations are currently being submitted to the appropriate authorities (AATB, FDA, etc.), and will be posted directly to our website as they become available over the next 45-60 days (www.bonebank.com/certifications/).

We continue to be dedicated to increasing the quality, innovation, support and service that you have come to expect from our two companies, and are grateful to our partners and customers who have chosen us to help fulfill their allograft needs. If you have any further questions regarding this change, please do not hesitate to give us a call at (210) 696-7616.

Sincerely,

Bone Bank Allografts

Executive and Quality Management Team
